The Buried Tower

PATREON.COM/MILBYSMAPS
MILBYSMAPS.COM

-The idea behind this map is that the tower was, at some point in the past, buried in an enormous landslide. It survived, badly damaged but largely intact. The landslide also diverted a nearby stream, which eventually came to flow into a hole in the tower's roof. The stream flowed all the way to the bottom-- at some point probably filling the tower with water-- before erosion, a sinkhole or other unspecified geological forces opened up a hole between the cellar and a large chasm below it.

-The tunnel in the side is a cavern or burrow whose inhabitants (creatures conveniently appropriate to your party's level) dug their way through the wall into the tower.

-This map was designed to be flexible. For that reason, the tunnel's far end was left ambiguously narrow so that DMs can decide whether PCs can squeeze through or not, depending on whether they'd like to attach more tunnels or keep it short.

-Likewise, the chasm was left open so that DMs can choose to add a series of caverns or some other dungeon for PCs to explore. If the DM doesn't want to extend it, they can always just have the chasm end in water.

-The former residents of this tower could have been anyone. If things like a laboratory, summoning chamber or other specialized rooms are needed to make the map appropriate to the story, I would suggest using the empty room at (2), the workshop at (5) or the obliterated bedroom on the third level.

-The chasm could also be an entrance to the Underdark, if the DM is looking to bring their PCs there.

-The vault in the cellar could contain the object of a quest here.
