# „In The Club" UI explanation

Hi, there are lots of buttons in the scene, which can get confusing, so I decided to make this little tutorial to explain some buttons, which are not self explanatory. Hopefully it will help you a bit!
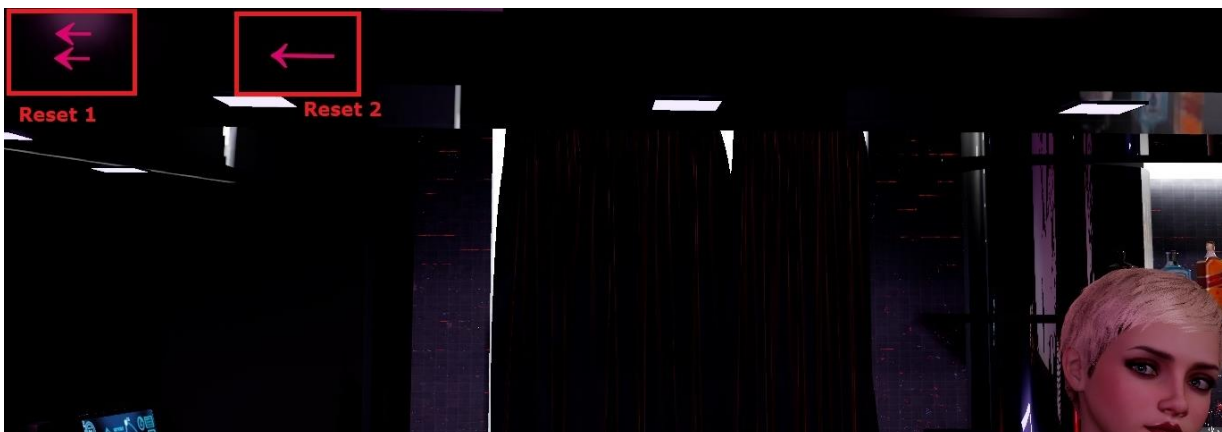

Main UI Buttons

Play Button:

- Starts the scene

**Reset Buttons:**

- Appear after you click the Play button
- Reset 1 resets the scene to the beginning
- Reset 2 resets the scene to the dancefloor

Boner Button:

- Makes dick big and ready for sexing
- In Possession mode there is also a collision trigger right in front of dudes penis, which does the same

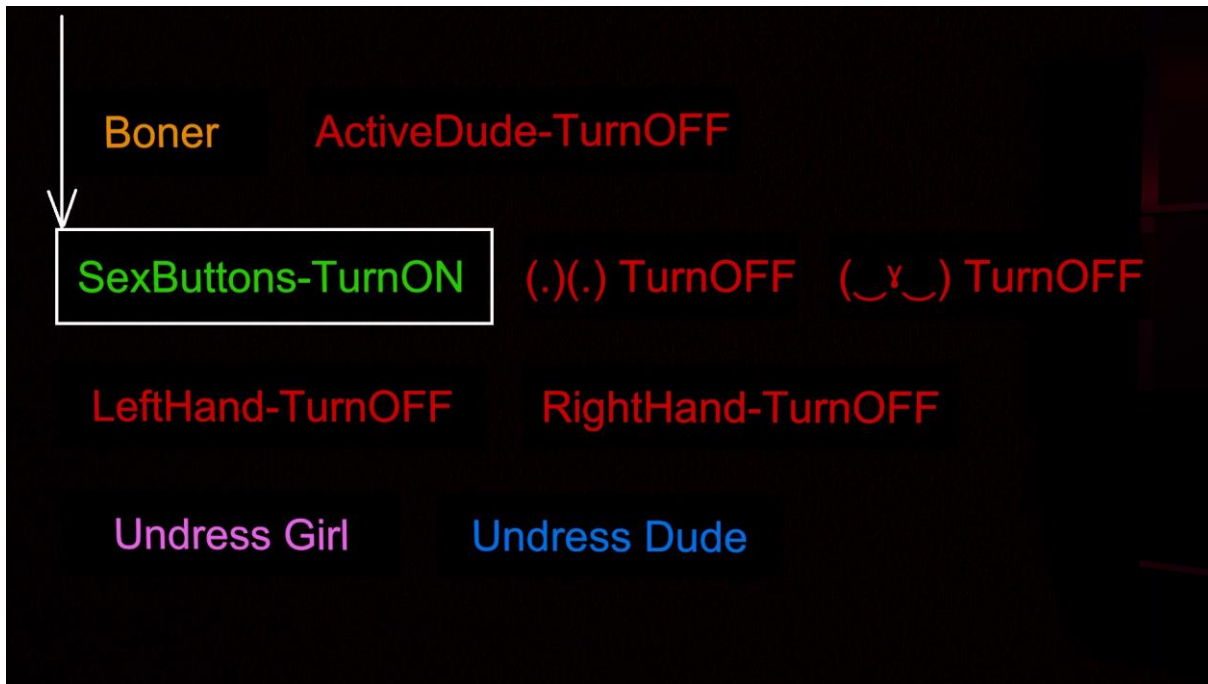

Active Dude Button:

- Switches between "Active Dude" and "Possession" modes
- On default (right after loading the scene) "Active Dude" is enabled
- If you want to switch the mode, do it before you press "Play" button, otherwise some stuff will not work
- In case you forgot to switch the mode and already pressed "Play" (happened to me several times), reset the scene and switch the mode after the reset
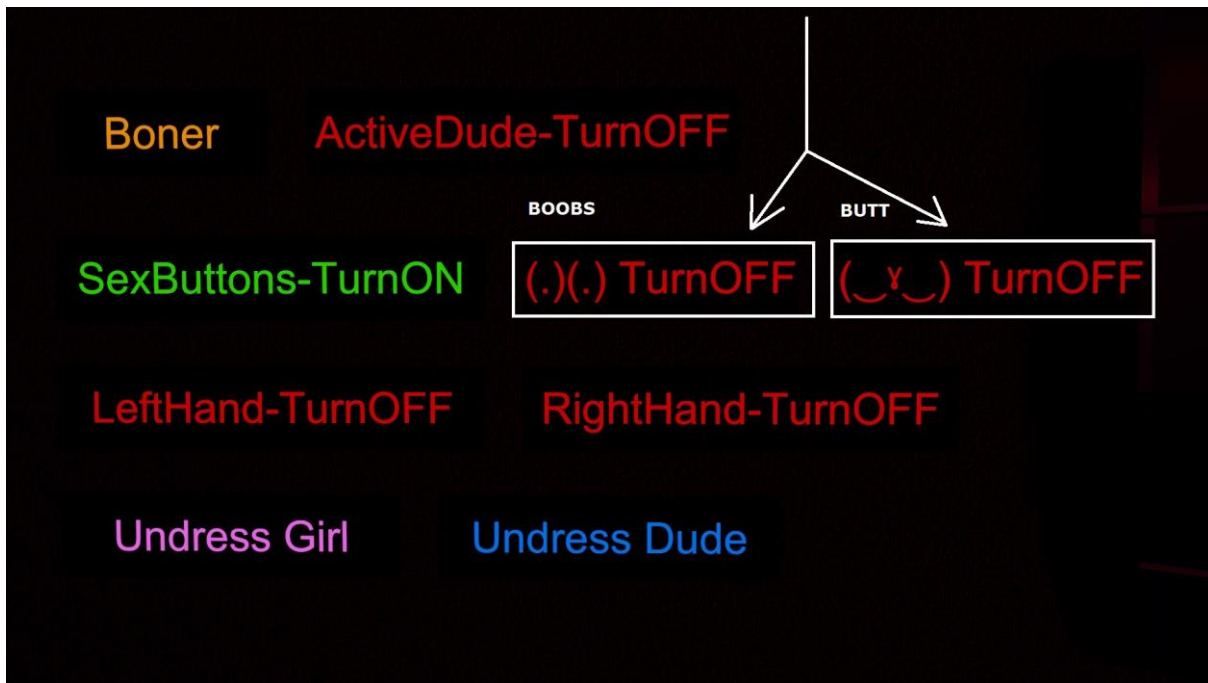

Sex Buttons:

- Turns on buttons for transitions from dancefloor to sex positions (BJ, Doggy etc.)

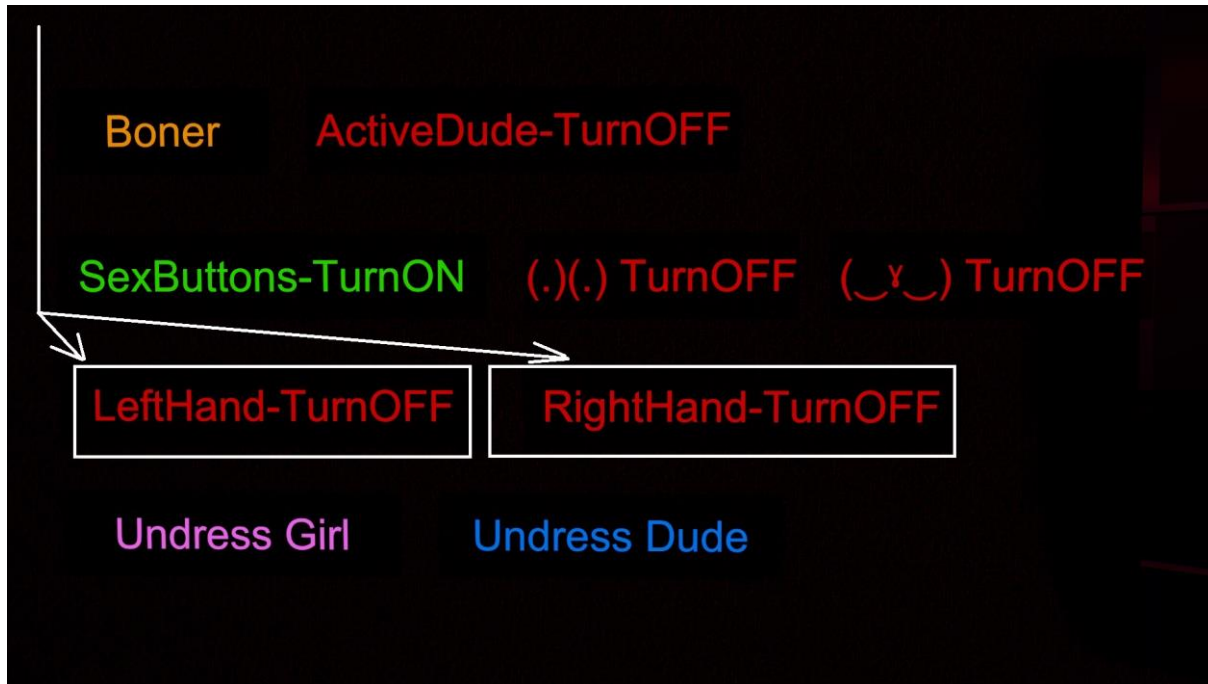

Boobs & Butt Buttons:

- Disable/Enable soft physics on girls boobies and butt
- Both are enabled on default

Spank Spheres Buttons for Left & Right Hands:

- Disable/Enable Spank Spheres on Dudes Hands, which are used for Spanking
- Both are enabled on default. Disabling them removes the additional collision they make, when dudes hands touch the girl

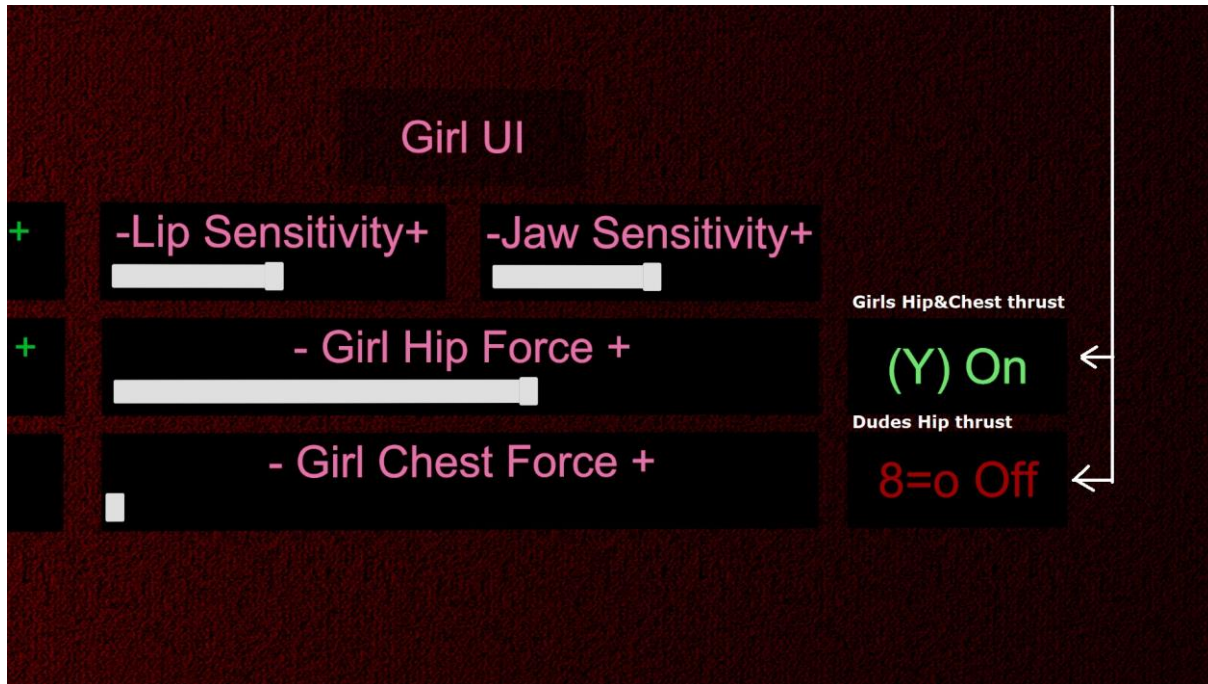

Lip Sync Adjustment Sliders

- Can be found under the "Girl UI"
- Used to adjust lip sync for moans

Girls Hip&Chest Thrust / Dudes Hip Thrust Buttons

- Mainly made for "Active Dude" mode (Have not tested yet how it works in "Possession" mode)
- Can be found under the "Girl UI"
- Enable/Disable Girls Hip&Chest thrusts and Dudes Hip thrust
- On default Girls thrusts are disabled and Dudes thrusting is enabled

Jukebox

- Controls the song choice
- Currently played song appears in green
- Next song appears in yellow
- Only choose a song when no button is yellow
- Songs will chosen on random, if you don't choose a song which should play next

Poledance/Striptease Part

Poledance Button

- Initiates Poledance/Striptease part
- Appears after you press "Play" button

Poledance Lighting Buttons

- Switch between different lighting modes for the poledance part

Poledance Skip Button

- Skips the Poledance for faster access to Pole Sex Positions

After Poledance Sex Positions Buttons

- Appear after the poledance or when you skip the poledance
