

# THE ULTIMATE FANTASY AUDIO EXPERIENCE

MICHAEL GHELFI

Dear adventurer,

To make the use of my work easier for you, I developed a directory structure that is meant to automatically export the Patreon files in the right folders. The folder structure is a simpler version of the structure I use for my own SFX libraries.

Each time you download a .zip from my Patreon, simply export the content of that .zip in the base folder called "Michael Ghelfi's Audio". It should automatically add the new folders or merge with existing ones.

If the program you use asks you if you want to overwrite any file, say yes. It should only overwrite this file or the general notice.

Your directory structure will grow over time. Feel free to manually add ambiences from my Bandcamp as well.

Any additional information about that topic will be addressed [in this post](#).

Thank you for your attention. Happy adventuring!

Michael Ghelfi
