Hello my friends! Before downloading aesthetic HOUSE to your save, here are a few things to tell you.

step one, you must write down all the cheat keys listed below.  
If you do not observe this, some objects may disappear! Please do first!

How to Cheat?

To use cheats, press Control + Shift + C to toggle the console on and off. You do this on Xbox or Playstation by pressing all four shoulder buttons simultaneously. Press enter after typing the cheat. For many cheats, you must also use testingcheats on or

they will not work. Most cheats are used in live mode

To enable TestingCheats, open the console with Left CTRL+Shift+C (press/hold with one fluid motion in that order) or by pressing all four shoulder buttons on console. Once the white box appears, type testingcheats on. To disable testing cheat, type

testingcheats off.

1.Testingcheats on (Enables testing cheats in The Sims 4)

2.bb.moveobjects (Allows you to move objects anywhere you want, good for building. Use the 9 and 0 keys to adjust the item you're 'holding'.)

3.bb.ignoregameplayunlocksentitlement(Ignore Gameplay Unlocks Entitlement)
