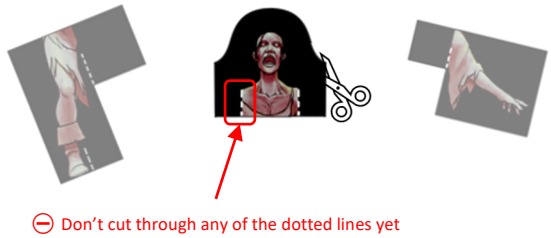
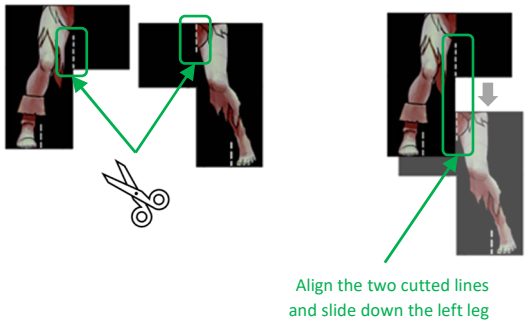
Assembling instructions

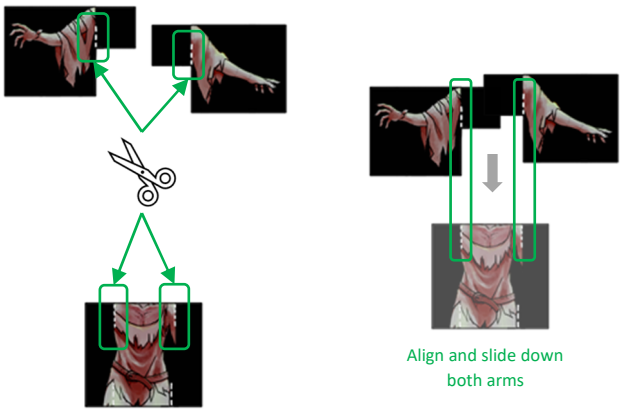
Step 1: Cut all parts by the external borders.



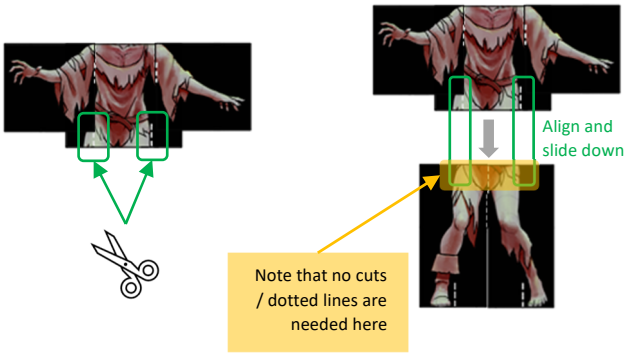
Step 2: Cut by the dotted lines of the upper part of each leg and assemble them together.



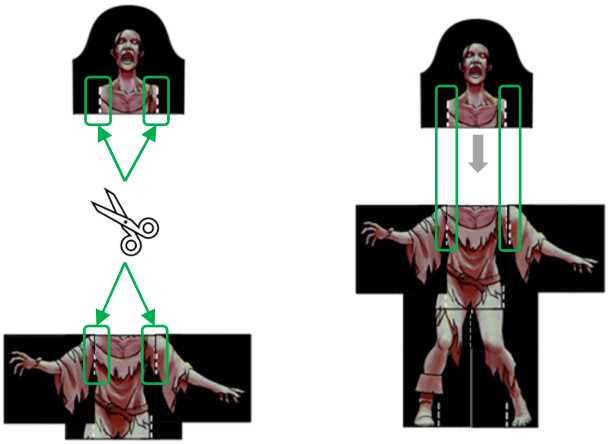
Step 3: Same steps as before, but with the arms and torso.



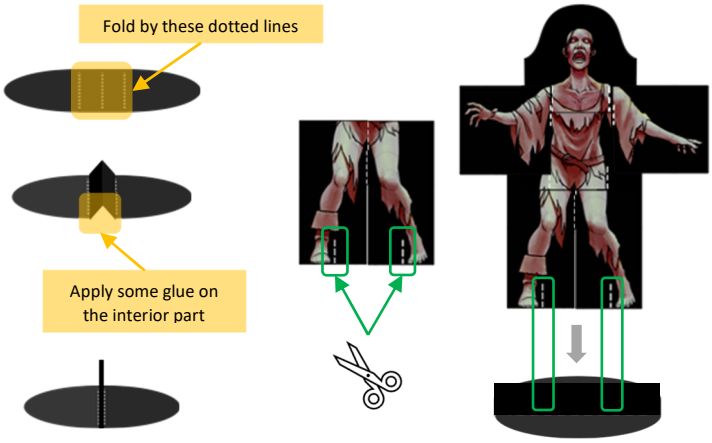
Step 4: cut by the dotted lines on the bottom part of the torso; assemble upper body and lower body.



Step 5: Cut by the dotted lines on the head, cut by the dotted lines on the top part of the upper body; assemble them.

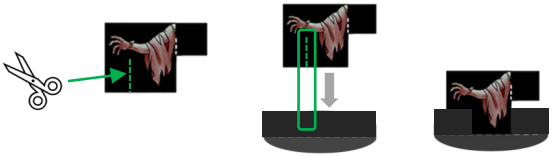


Step 6: Cut the base, fold it, and paste it; on the feet, cut by the dotted lines and assemble to base. That's all!



Tips

1) Optional: you can cut a small part of the arms and assemble them to the smaller bases, to create something like this:



2) When cutting the dotted lines, make a small cut first and then test the assembly. If needed, extend the length of the cut and test again (until you have a perfect fit) – this way you'll avoid making a cut longer that it should.
